To our patients,

We are here for you and your children now more than ever! We have many new protocols in place to keep patients and staff safe while in our office.

Wellness exams are so important to keep kids on track, and make sure they are healthy physically and emotionally. We are keeping with the recommended wellness check-up schedule for babies, children and teens.

Whether you have concerns about your child being sick or concerns about their behavior or emotional well-being, please don't wait to get the medical help your child needs. Call us!

To make it easier for you, many appointments can now be scheduled by video. These appointments help your child to continue to receive the best care without leaving your home. To find out if a video appointment is right for you, please call us to discuss your needs.

If you do need to come in, please know that your health and safety are our top priorities. Here are some of the ways we are keeping you safe:

- Screening for common COVID symptoms for every person entering our building
- “Curbside” visits from a patient’s car when appropriate to promote isolation
- Patients wait and check in from their car, then are called directly into a sanitized exam room
- Social distancing every place where people go
- Isolating potential COVID patients from others
- Continuous cleaning and disinfecting everywhere in our building
- Doctors and caregivers wear necessary personal protective equipment (PPE)

We want you to know that your family is very important to us during this uncertain time and we are still here for you. Please feel free to call us with any questions.

Sincerely,

Magdalenne Corso, M.D.

James Resk, M.D.

Troy Stoeber, M.D.

Kristine Uyesugi, M.D.
